SUMMARY:

Pre-final year B.E. student with interest in data-driven problem solving and technology solutions. Skilled in SQL, Python, and basic web development, with hands-on experience through projects and hackathons.

WORK EXPERIENCE:

CROP QUALITY CLASSIFICATION USING MACHINE LEARNING

- Worked in a team to study and analyze crop disease classification problem
- Conducted literature review and explored research papers to understand existing solutions
- Collected datasets from sources like Kaggle and performed data preprocessing
- Applied basic machine learning models to classify plant diseases and compared performance
- Contributed to understanding model selection based on accuracy

PROJECTS:

CUSTOMER INSIGHTS DASHBOARD (SQL + PYTHON)

- Built a data-driven dashboard using SQLite and Python to analyze customer data
- Wrote SQL queries (joins, aggregations) to extract insights like top customers and revenue trends
- Developed an interactive interface using Streamlit for visualization
- Demonstrated practical understanding of data analysis and business insights

WEATHER APPLICATION (JAVASCRIPT + API)

- Developed a weather application using JavaScript and external API integration
- Fetched and displayed real-time weather data based on user input
- Designed a responsive and user-friendly interface
- Deployed the application using Vercel

ACHIEVEMENTS:

ZS CAMPUS BEATS TECH CHALLENGE 2026 – TOP 100 FINALIST

- Selected among top teams for solving a real-world business problem using structured workflow design
